RELEVANT EXPERIENCE

Large Healthcare Organization: Data, Analytics and Data Governance Strategy Consultant

Summary: Data & Analytics Strategy, Data Modernization, Data Governance and CDAO Organization Design

A large, hospital system was embarking on a multi-year strategic road-mapping exercise that would lay out initiatives for everything from hospital facility modernization, patient care improvements, IT modernization to enhancing their Data and Analytics capabilities. Mr. Garg conducted an assessment across more than 25 departments, various business and IT leaders, to develop a multi-year Data, Analytics and Data Governance Strategy. The strategy encompassed a technology roadmap, including capabilities for big data, advanced analytics, data acquisition and distribution architectures, hybrid cloud infrastructure, streaming and real time capabilities, edge computing and devices data, operational analytical workflow, data governance, among others, augmenting their existing capabilities. As part of defining and mobilizing a new Data Governance framework that included but not limited to, Meta Data Management, Data Lineage, Data Literacy and Master Data, across the hospital system. Mr. Garg helped design a hybrid organization structure and build a new CDAO organization, identifying new key roles and leaders within the hospital system best suited for success. This included defining and influencing formalizing augmented job responsibilities, shifting the ownership of data to business stakeholders and strengthening IT's role as enablers. Mr. Garg led the effort to enable the stakeholders get the business case, roadmap and budget approved by the CIO's Office, and the board and getting them started on executing the first phase of the multi-year roadmap.

Financial Services Company: Data Governance Strategy Consultant & OCM Leader

Summary: Data Strategy, Architect Solution, Organization Change Management and Execution of their MDM, Data Warehouse, Data Lake, Analytics and Data Governance Strategy.

The CIO was challenged around the data landscape, platforms, security, consistency and reliability of data shared across applications, reporting and analytics across the organization. Mr. Garg conducted an extensive data management assessment, across applications, reporting, analytics and data platforms, business stakeholders, information producers and laid out a 3-year roadmap including technology, processes, organization structure and data governance. He led the formation of the Data Governance Organization, bringing the Business and IT together as collaborators in defining common data assets, building data solutions, prioritizing initiatives that provided the greatest impact to the business initiatives and their digital strategy. Mr. Garg led the effort to evaluate, select and implement data security, data quality and AI enabled catalog solutions to eliminate the risk of leakage of sensitive data assets, improve quality and reliability and enable data lineage across the enterprise. Through these initiatives, the client was able to focus on data security, fraud detection, controlled access to sensitive data and increased consistent data literacy enabling collaborative reporting and analytics to achieve business objectives. By reducing the data silos and shared knowledge the organization realized the benefits in reduced time to achieving meaningful outcomes accelerating their digital journey.

Major Retailer: Data Governance Strategy / MDM Consultant & OCM Leader

Summary: Master Data Management, Data Governance and OCM.

As part of a Global Financial Transformation initiative, Mr. Garg led a multi year Master Data Management initiative, for 3 different data domains, across more than 14 countries. In addition to the vendor evaluation, Mr. Garg led the technology implementation, data consolidation across more than 300 integration points into a single Master Data platform, and enabled the distribution of cleansed, enriched and consistent data to both upstream and downstream applications. Mr. Garg led the Data Governance program, a new concept to the organization, bringing business leaders, data stewards and champions to define, collaborate and establish the ownership of each of the data assets. Mr. Garg led defining and building the Data Governance and Stewardship Organization with roles and responsibilities, process in order to enable business ownership for decision making in a timely and consistent manner. This effort was a multi year program which involved extensive education, onboarding and change management across hundreds of stakeholders across the globe.
